RTTS Announces Online Distance Learning Program; First Courses Centered Around IBM Rational Tools

Tuesday July 31, 8:00 am ET

Software Testing Firm Helps IT Professionals Grow Careers On Their Own Time

NEW YORK, July 31 /PRNewswire/ -- RTTS, a professional services organization specializing in software quality assurance, announced today the launch of its worldwide online distance-learning program. The online distance learning program is an exciting expansion of RTTS' well-regarded in-depth testing tool training courses. The first online courses will be centered around IBM Rational tools, with additional courses from HP, Microsoft and Compuware to be added shortly.

"We are offering the IT testing community the opportunity to learn new skills on their own time, at a cost-savings to themselves and their employers," said Bill Hayduk, CEO of RTTS. "We have taken our successful classroom courses and divided them into convenient, hour long segments over a two-week period. IT professionals no longer have to take a full week off from work and fly to another city to improve their skill set - they can do the sessions on their lunch hour, and work on the exercises on their own time. "

The online distance learning courses will be taught in real-time by RTTS' group of expert trainers. The typical curriculum will include introductory courses from the vendors that will be supplemented by RTTS' advanced courses. RTTS' internal team of experts developed the RTTS training programs. "All of our instructors have worked here at RTTS as software testers with a wide variety of Fortune 500 clients," said Eric Smyth, Director of Educational Services, RTTS. "So we are end users of the software as well as instructors. RTTS' online distance learning curriculum focuses on topics that have been experientially useful to us as testers as well as the real-world problems that we know will come up, and the real-world tools that will solve those problems."

RTTS is also offering a unique support system for its online students. While questions can be asked in real-time during the sessions, RTTS will also offer online "office hours" twice per week where students can call, email or IM their instructor to ask questions and get help.

For more information on the online distance-learning program, including schedule and requirements, visit <http://www.rttswb.com/training/distanceLearning/>.
