RTTS opens office in Philadelphia

New York, June 9, 2006 - The software quality experts have entered the Philadelphia testing space. RTTS, the premier provider of software quality for the past ten years, is opening another office. Currently, they have offices in New York (headquarters), Orlando and Phoenix. The Philadelphia office will be their fourth location, which will allow them to provide consulting and education services in the booming business district of that area.

RTTS has provided top-tier on-site consulting and on-shore outsourcing services that support the testing of the most demanding and complex business applications and architectures for the past ten years. These solutions enable customers to gain significant ROI while delivering higher quality applications. "We have seen a significant increase in demand for our services in the past few years in general and in the Philadelphia area in particular. Having a presence here seemed like the next logical step for us" says Bill Hayduk, Director of Professional Services at RTTS.

Along with RTTS' unprecedented consulting services, they also provide top training classes for the leading automated testing tools in the market. Their certified instructors deliver classes in their state-of-the-art Education Center at their New York headquarters as well as across the United States and Canada. The Philadelphia location will also hold these top notch classes at a convenient and accessible location.

About RTTS:

RTTS is the premier professional services organization specializing in the testing of IT applications and architecture. They have been serving Fortune 500 and mid-sized companies in many vertical industries including, financial, insurance, telecommunication, pharmaceutical, and technology firms in the U.S and abroad since 1996. RTTS has offices in New York, Orlando, Phoenix, and Philadelphia. RTTS draws on its best-of breed tools, expert test engineers and proven methodology to provide the foremost end-to-end solution to ensure application functionality, reliability, scalability and network performance.
