Microsoft and RTTS co-host Live Seminar

New York, NY, May 9, 2006– RTTS, the leader in the automated testing industry for the past ten years, is partnering with Microsoft Corporation to co-host a seminar on Microsoft's *Visual Studio Team Test 2005*. This seminar will feature a presentation of Microsoft's new test tools and their features, including a demonstration of the load testing tool. The scheduled date for the seminar is May 23rd at Microsoft Corporation's New York headquarters.

Visual Studio Team System 2005 is a suite of products aimed at improving collaboration and increasing productivity between developers, architects and testers for development of enterprise applications. *Visual Studio Team Test*, the testing module of *Team System*, provides robust products that combine ease-of-use testing with the power of Visual Studio at a price point that significantly reduces cost and increases your ROI.

"It is our pleasure to co-host a seminar with the world's premier technology company." said, Bill Hayduk, Director of Professional Services at RTTS. "Microsoft has produced an excellent suite of test tools that combine the scalability needed in enterprise computing with the ROI demanded of our clients".

RTTS provides on-site consulting, mentoring and educational services supporting the implementation and maintenance of Microsoft's Visual Studio Team Test. RTTS' solutions enable customers to gain significant returns on their investments while delivering higher quality applications.

How to register for the seminar:

Anyone can register at www.microsoft.com by simply going to the events page or by visiting <http://msevents.microsoft.com/CUI/EventDetail.aspx?EventID=1032297476&Culture=en-US>.

The seminar will be held in Microsoft's New York office on May 23, 2006 from 9:00am to 11:00am.

About Real-Time Technology Solutions:

RTTS is a professional services organization that specializes in testing of critical business applications and architecture. Serving Fortune 500 and SMBs alike since 1996, RTTS assures application functionality, reliability and scalability by arming its expert test engineers with the best-of breed tools and its proven methodology. RTTS' client list reads like a "Who's Who" list among the top financial, insurance, telecommunication, pharmaceutical, and technology firms in the U.S. RTTS' comprehensive range of services includes functional, scalability and architecture testing, in addition to tool training and process improvement.
